- What is the difference between chronic pelvic pain and pelvic venous congestion syndrome?
- What other medical names are there for pelvic venous congestion syndrome?
- What has caused pelvic venous congestion syndrome in my case, why have I got it?
- Is there anything I should avoid doing, for example:

.....
(name activity you enjoy or are worried about such as sports, gardening, flying)

- What else can I do to prevent suffering from pelvic pain?
- What kind of chronic pelvic pain do I have?
- What can I do to avoid triggering pelvic pain?
- What should I do when I am suffering from pelvic pain?
- What should I tell my family/partner/friends about my condition?
- Do I need to have any tests to find out more about my condition?
- Will I ever be free of pelvic pain and get my normal life back again?
- Is pelvic pain hereditary – might my children be at risk?

Medical management

- What medications are typically prescribed for pelvic venous congestion syndrome?
- How does it work and what are the possible side effects?
- How do these medications impact the activities I can do?
- Will they stop the pelvic pain occurring?
- Can I ever come off the medications completely?

Other treatments

- What are the alternatives to medication?
- What things should I consider when I am thinking about for any non-drug treatments, such as:
 - Pelvic pain embolisation
 - Surgical treatment

Surgical solutions and ovarian vein embolisation (if applicable)

- Where would I have the procedure done?
- How long would I need to wait before I can have the procedure?
- Would I need more tests beforehand?
- How would I need to prepare for the procedure?
- How does the procedure work to treat my pelvic venous congestion syndrome?
- How long does the procedure take?
- How long would I need to be in hospital?
- How long will pain typically last after the procedure?
- When would I be able to go back to work/normal activities?
- What are the risks and side effects?
- What is the success rate?
- Will my symptoms be completely gone?
- Does the procedure need to be repeated or does the result last forever?
- Is there anything else I need to know about the procedure?
